Site Owner: Bud Rusch
Site Name: Gillett Mini-Mart
Site Address: 6255 Hwy 32 North, Gillett WI 54124

Program contact: Dee Zoellner, Site Review Hydrogeologist
Program contact address: 2129 Jackson St., Oshkosh WI 54901
Program contact phone: 920-424-0046

Submitted Questions and Responses

1. Will the Department of Commerce provide the "Groundwater Assessment" section of the SI report or other information on the degree and extent of groundwater contamination? It appears this section was not included in the report. **An additional written comment was taken from the Results and Discussion: Ground Water Assessment – Figure 7 illustrates the estimated extent of the impacted ground water plume above the benzene preventative action limit (PAL). The ground water flow direction is to the south-southeast. The plume extends south of the site across the property boundary and onto properties owned by others including the Wisconsin Department of Transportation (WDOT). The ground water data summarized in Table 4 indicates that the Gillett Mini-Mart and Baumgarten potable wells have not been impacted by the petroleum plume to date. The ground water sample collected from monitoring well MW-7 contained only one compound, MTBE, above its PAL. The ground water sample collected from monitoring well MW-8 (on the Baumgarten property) did not contain compounds above the PAL. Ground water contamination in excess of the enforcement standards may not have migrated beyond the property boundary. Quarterly ground water monitoring is being performed as detailed in Table 5. The sampling schedule allows for trends in the controlling compounds to be observed as well as evaluates the potential for natural attenuation.**
